EDUCATION

University of Alberta - B.S. Computer & Software Engineering, Co-op Program 2022 - 2027

Honours: Alberta Rutherford Scholarship, Max Wyman Leadership Award, United Association Scholarship

SKILLS

Programming: Java, Python, C/C++, HTML/CSS, SQL, SwiftUI, React, Rust, Assembly, VHDL, Verilog

AI & APIs: Large Language Models (LLMs), Prompt Engineering, REST APIs, Flask-based automation

Tools: Git, VS Code, XCode, Eclipse, soldering, KiCad, LT Spice, PCB Design, Google Suite, MS Office, Azure

Operating Systems: Windows, MacOS, Linux/Unix

EXPERIENCE

NTWIST Inc. June 2025 - August 2025

AI Process and Automation Intern

- Developed a Flask-based API to automate MOM generation from PDF transcripts, outputting structured Word documents using OpenAI language models
- Automated data extraction to populate internal Excel (AID) templates from AI-generated summaries
- Performed API testing and QA with Postman to refine outputs and support automation workflows

Linkbuffer Studios and Research Labs Ltd.

February 2025 - May 2025

Student Intern - Project Management

- Developed flowcharts, wireframe designs, and a project description for a mobile app to track user performance
- Self-taught Swift, Dart and Flutter to design the app's UI, showcasing adaptability and technical initiative
- Streamlined project flows and documentation and created reports using Microsoft Excel

University of Alberta Electrical Engineering Club

September 2023 - Present

Junior Executive

- Designed precise models and projects using Circuitry, LTSpice, Arduino, PCB Design, KiCad, and Soldering
- Tested performance of student projects using test cases and helped them optimize project functionality

HackED Beta Competition

November 2023

Team Leader

- Led team to develop and test an interactive website enabling users to build customized concert bracelets
- Implemented Python for backend functionality and HTML/CSS for a user-friendly interface
- Recognized by judges for design functionality, attention to detail, and collaborated team presentation

PROJECTS

Eventure | *Java, Android Studio, Firebase*

- Android event management app with real-time creation and registration backed by Firebase authentication and cloud database services

Emoji Selector | *SwiftUI, XCode*

- Developed IOS app with user-selected emoji display, demonstrating UI/UX design proficiency and best practices

Geomatics | *Python, Spyder*

- Tool to manage Travelling Salesman Problem datasets with data filtering and Euclidean distance plotting

Conways | *C++, Visual Studio Code*

- Simulated Conway's Game of Life with dynamic grid updates and user-controlled display and step functions

CERTIFICATIONS

- Emergency First Aid & CPR/AED Level C (August 2023)
- DELF B2 for French Proficiency (July 2022)
- Alberta Class 5 Advanced Driver's License (September 2021)
